

Consciousness

The basic nature of the universe is consciousness -- pure intelligence. At its very depth, the universe acts like a mind. Information flows around and through all processes. All things are intimately and infinitely connected by the flow of the consciousness.

Nature is purposive; it possesses deep intentionality. The laws that govern the universe are contained at the deepest level.

That is why one can find this information during inner journeys. Always remember that he who is capable of deep inner reflection will gain the Truth of being, because that is where it is kept.

At the universal consciousness level we are all connected, we are ONE. When perceiving from this Source of consciousness everything is united: observer and observed are ONE. The Source is perception and Love in action, transcending all forms.
